12:00 - 13:00 Lunch  
13:00 - 15:00 Workshop training and deploying your models in Azure using Machine Learning Studio  
15:00 - 15:15 Closing  
15:15 - 16:00 Drinks

---

## Claiming your Azure Pass for the Workshop

<https://checkin.globalai.community>

Check-in with your name and personal e-mail, but create a new Outlook account for the Azure Pass account. When using a new, fresh Outlook account we make sure we do not run into any problems with Azure subscription de-activation for certain e-mail domains.

Follow the instructions as e-mailed after check-in (be sure to check spam and junk folder) and use **GAIUT22** as the event code.

---

## Workshop

<https://github.com/OrdinaRoelant/MLStudioWorkshop>

The workshop contains three parts:

1. Training a model
2. Deploying a model
3. Running Automated ML experiments

Please check the `global-ai-bootcamp.md` Markdown file in the root of the repository.
